

WHICH DOG WOULD YOU CONSIDER TO BE AT A HEALTHY WEIGHT?

Lift the flap to see if you are correct

IDEAL

The ribs are palpable, the waist is obvious, and a distinct abdominal contour can be seen near the tailbone.

OVERWEIGHT

The ribs are difficult to palpate under a fat pad, the waist is absent or hard to visualize, and there is no abdominal contour.

OBESE

The ribs are not palpable under heavy fat, and no waist or abdominal contour can be visualized.
